Customized electronic commerce method using internet

Abstract (Basic):

... A customized electronic commerce method using the Internet is provided to purchase goods as optimum price in an order client and secure profit...

... A customer goods service store connects to a web server through an Internet network, registers goods specification to a corresponding customized, and pays a manufacturing cost, and a contract to order and manufacturing request is automatically concluded(S12). The web server totalizes order request cases according to a type and a receipt case of money and decides the amount of goods capable of manufacture(S13). A customized manufacturer registers an estimate capable of manufacture to the totalized amount of goods to the web server(S14). The web server selects a manufacturer on the basis of the manufacture capability and estimate of customized manufacturers(S15). The customized manufacturer selected as the manufacturer requests the delivery of the manufacture-completed customized to a conveyance enterprise, and the conveyance enterprise delivers a corresponding customized to an order manufacture client(S16). The web server checks the corresponding customized, pays a price to the customer-made manufacturer on the basis of a conveyance requested...

...manufacturing cost to the customer-made service store(S17). The conveyance enterprise delivers the corresponding customized to the customer-made manufacture client(S18...

Invoice purchase order tracking and reconciliation method...

```
...Abstract (Basic): The method for tracking and reconciling purchase orders between a customer and a manufacturer involves grouping together a number of purchase orders issued by a customer under a letter of credit. The data from the purchase orders is then entered into a computer, along with the letter of credit reference number provided by the financial institution, and is sent in structured message format to the electronic message centre of the financial institution. The letter of credit number is a unique identifier for the issued letter of credit, and serves to link all other transactional data...
```

...The **electronic** message centre is then accessed by a transaction processing system which reconciles the information to assure that the correct message have been received, and that the **purchase order** messages match the referenced letter of credit. If the reconciliation is successful, the **purchase order** messages are stored in the **invoice purchase order** system database repository on a file server.

Later amendments to the **purchase orders** , and/or letters of credit, similarly flow through the system...

...USE - Tracking and reconciling **purchase orders** between customer and manufacturer, and payment between financial institution and beneficiary pursuant to letter of...

...ADVANTAGE - Allows for entry of and search for information related to either **purchase order** or letter of credit...

...International Patent Class (Main): **G06F-017/60**

Detailed Description

**Detailed Description**

... network 100 then closes the browser session and activates a  
Transaction Processing Application which uses **electronic** commerce  
modeling language (ECML) or similar open protocol, to complete the  
seller's 104 **order form** ; generate a **unique** transaction  
identification number (TIN); place the TIN in the credit card data field  
of seller...this information along with the TIN to the Web Server which  
then completes the sellers **order form** and generates a **unique**  
transaction identification number (TIN) and inserts the TIN into the  
field in the form reserved for the credit card data. The completed form  
is passed to **web** server 303, line 312, and on to buyer 102, line 114.

Buyer 102 then authorizes...
